

Dai Hancheng (Ph.D.)

✉ College of Environmental Sciences and Engineering, Peking University

☎ Tel: (+86) 10-6276-7995

🏡 Address: 426 Environment Building, Peking University, Beijing, 100871, China

✉ Google Scholar  ResearchGate  LinkedIn  Facebook ✉ dai.hancheng@pku.edu.cn

Assistant Professor *Ph.D. in Environmental Economics*

Research Keywords: Dr. Dai's research has been focusing on developing the state-of-the-art integrated assessment models to find out how the society could transit into a **low-carbon and sustainable future** at the local, national and global scales. Using these models, he explored key questions such as the mitigation cost of achieving the Copenhagen targets, Nationally Determined Contributions (NDCs) for the Paris Agreement and 2°C degree targets in China, the co-benefits of climate mitigation on air pollution improvement, human health improvement, water saving and resource efficiency, as well as the effects of emission trading policy in China. More recent publications are available at [University homepage](#) or [Personal Homepage](#) or [Google Scholar](#) or [Researchgate](#).

Professional Experience

Position

- 2017/10 – present  **Executive Director.** International Project Office of Monsoon Asia Integrated Research for Sustainability, Future Earth (MAIRS-FE).
- 2017/1 – present  **Assistant Professor.** College of Environmental Sciences and Engineering, Peking University.
- 2013/01 – 2016/12  **Research Associate.** Integrated Environment and Economics Section, Center for Social and Environmental Systems Research, National Institute for Environmental Studies, Japan.
- 2009/04 – 2009/09  **Research Assistant.** Integrated Assessment Modeling Section, National Institute for Environmental Studies, Japan.

Lectures

Environmental Research Method
Introduction to Environmental
Science & Engineering

-  3 hours per week.

-  2 hours per semester.

Research

- CGE model  Development of Intergrated Model of Economy, Energy and Environment for Sustainable Development of China, which is a multi-sector, multi-region, recursive dynamic computable general equilibrium (CGE) model of China and the world.
- Energy system analysis  Development and application of bottum-up type energy system optimization model.

Education

- 2009/10 – 2012/12 ■ Ph.D., Tokyo Institute of Technology, Japan in Social Engineering.
Thesis title: *Integrated assessment of China's provincial low-carbon economy development towards 2030: Jiangxi Province as an example.*
- 2006/10 – 2009/03 ■ M.Sc., Technical University of Munich, Germany in Environmental Planning and Engineering Ecology.
Core field: *Renewable resources and renewable energy.*
- 2002/09 – 2006/07 ■ B.Sc., Peking University, China in Environmental Science.
